

# Careers and Destinations

## Where can studying at the Centre take me?

At the North Bristol Post-16 Centre, we are very proud of providing comprehensive support to students throughout their time with us so that they can take advantage of excellent, personalised teaching and move on to the best destination for them. In 2022, over 280 of our students secured places at university, with many heading to top universities (including 6 to Oxford/Cambridge). In addition, we supported students into a range of high quality employment, training or further education opportunities. Whichever direction you are thinking of taking in life, please see below for information on how NBP16 could help you achieve your goals, with some examples of our students' destinations in recent years.
